

# PSEO

## Course Guidelines

You have been accepted to a PSEO college and plan to attend. Congratulations!

Your next steps for course registration are specific to the college. Most colleges require students to attend a PSEO Orientation. They assign students to an Academic Advisor to assist with college course registration. Detailed information is often included in your admission letter from the college.

You should have met with your PHS counselor in the spring regarding PSEO expectations and course guidelines for the following school year. Since students often register for fall courses in the summer when counselors are not available, this form serves as a guideline for college course selections.

Graduation requirements can be fulfilled at Park OR at the college. A year-long Park course typically equates to a 1-semester college course. Below are course and credit equivalents with sample courses.

Once you have registered for PSEO courses, you must submit a copy of your college schedule to your Park counselor. No changes will be made to your Park schedule until your PSEO schedule is received.

---
